Curriculum Structure within IB

The IB is a framework that allows the school to organize its curriculum around six themes. While the lessons change according to student interest and other situational/contextual changes and age, the themes and the learning outcomes stay the same:

Who We Are

Where We Are In Place And Time

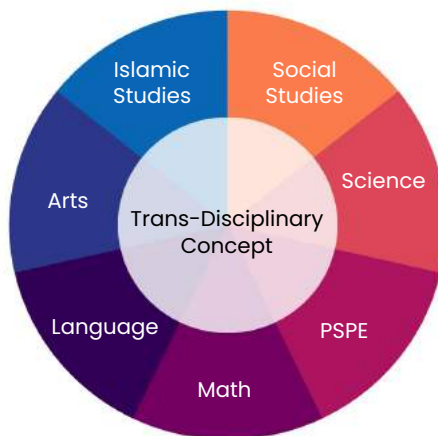

How The World Works

How We Express Ourselves

How We Organize Ourselves

Sharing The Planet

The Primary Years Programme is transdisciplinary. This is intentional because children at a young age learn by doing and by making connections to the world around them. Rather than separating learning into separate and siloed buckets, teachers collaborate to provide opportunities for children to connect the dots in every class-for example, a study of the water cycle can be explored in the garden, then in English or Bahasa class by writing or reading and in art by using a wide range of mediums to illustrate it.

IB Subjects

The PYP Exhibition

In the final year of the programme, which will be at Year 6 of the IB PYP, students are expected to participate in a culminating project - the PYP Exhibition. This is designed to demonstrate their competence in all areas of the programme.

Assessment
